Guidance for 2019

The Group revenue of continuing operations for 2019 is estimated to be in the range of +5% and -3% compared to the 2018 combined revenue of continuing operations (pro forma, restated 2018: EUR 3,201.0 million). Previously the company estimated the revenue in 2019 to be in the range of +5% and -5% compared to 2018.

In 2019, the adjusted operating profit¹ of continuing operations is estimated to be EUR 160-200 million (pro forma, restated 2018: EUR 132.0 million). Previously the company estimated the adjusted operating profit of continuing operations in 2019 to be EUR 150-210 million.

GUIDANCE RATIONALE

- The result guidance for 2019 is based, for instance, on the completion of Mall of Tripla in the last quarter, the estimated time of completion of residential projects under construction, and the company's solid order backlog. At the end of June, 77% of the order backlog had been sold.
- Significant fluctuation is expected to take place between the quarters due to normal seasonal variation, sales of business premises projects, and the time of completion of residential projects and Mall of Tripla. As in 2018, the last quarter of the year is expected to be clearly the strongest.
- The company estimates that the adjusted operating profit for the third quarter of 2019 will decrease from the comparison period (pro forma, restated EUR 31.4 million) and be clearly positive.

¹ The adjusted operating profit reflects the result of ordinary course of business and does not include material reorganisation costs, impairment charges or other items affecting comparability. Adjusted operating profit is disclosed to improve comparability between reporting periods. Adjusting items are defined more precisely in bulletin's the tables section.
